
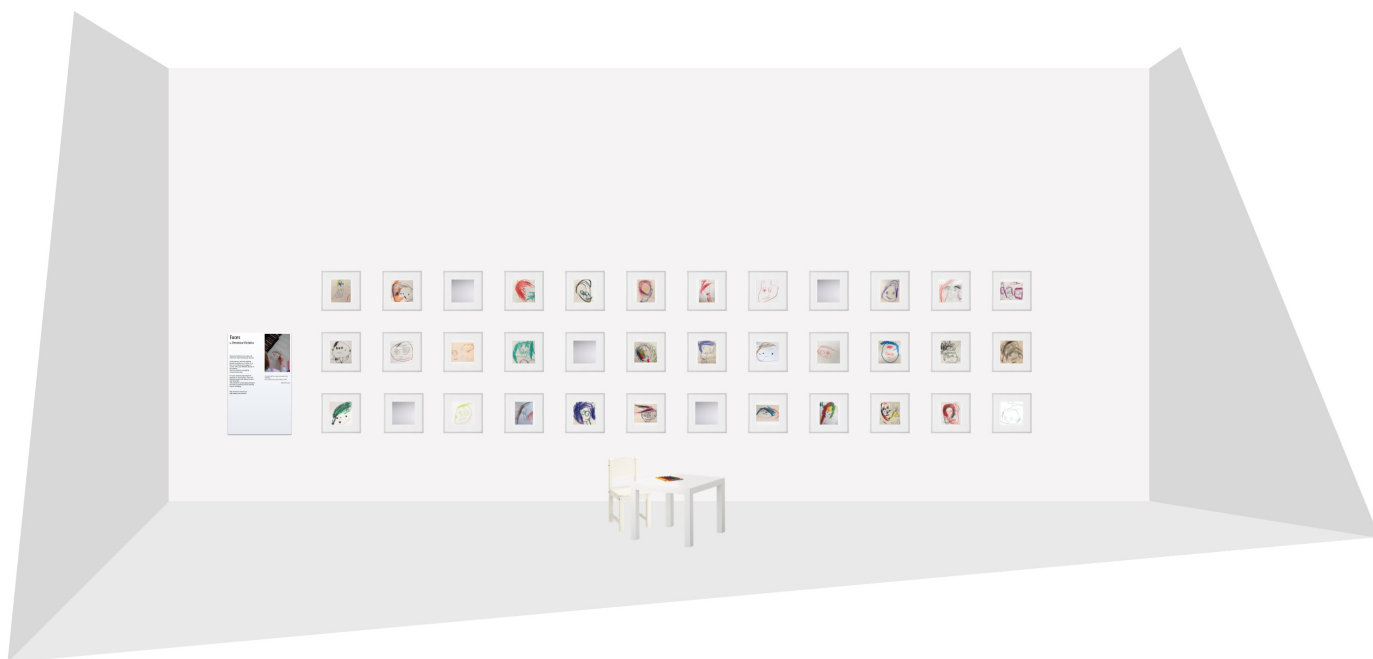

Exhibition concept

The central part of exposition is a wall with posters and mirrors in the frames. White children's table and chairs in front of it. Washable pencils and paper on the table. Visitors are welcomed to get inspiration to create a self portrait and add their sketch to a particular place.

Theoretically washable pencils allow drawing faces everywhere. Even very young visitors can participate in the art creation. At the end of the exhibition, a collection of faces from visitors will be present in the room.

IKEA table, chairs, frames, and mirror can be used, like this:

Washable pencils STABILO Woody 3 in 1 would be used.

Note: All of the presented sketches are photos and can be displayed as posters in frames. We have originals, but they are of different sizes and show only a part of the collection.

Sketches available at <http://veronica-victoria.art>
